PROPOSALS

For Publishing, by Subscription,

THE COMPLETE WORKS OF

SIR WALTER SCOTT:

With a Biography: being the first American (and only) edition which contains the Author's last additions and illustrations, arranged upon their respective pages.

A COMPLETE and uniform edition of the various productions of the great 'Minstrel of the North,' is a *desideratum* with the American public. No library is complete without them, and no edition extant is sufficiently compact for such a repository; while the endless number of editions, *without any uniformity in size*, heretofore published, besides being exceedingly cumbrous, are far too voluminous and expensive to be within the reach of the great majority of readers. The undersigned therefore announce, that they have now in press, and will issue, an edition of the Works of Sir Walter Scott, which will embrace all his Poems, Novels, Histories, Biographies, and Fugitive Compositions, as well as the Biography and Private Correspondence, now in the course of publication in England, under the superintendence of Mr. Lockhart.

1st. In Parts: each Part embracing as much matter as is contained in two volumes of the present editions of the Waverley Novels, which will be put at the unprecedented low price of THIRTY SEVEN AND A HALF CENTS.

2d. Two parts will appear each month; but should the publishers find the work to meet the patronage they anticipate, FOUR PARTS will be issued monthly.

3d. The whole will be completed in *seven volumes*, or *forty eight parts*.

The paper on which the above is now printing, has been made expressly for the purpose; the present parts may, therefore, be considered a fair specimen, in every respect, of the whole work; but, should dissatisfaction arise with any subscriber, owing to an inferior article being offered, he may discontinue at any time, and have the amount paid returned.

Note.—The publication of the first volume is deferred until the receipt of the Biography, Private Correspondence, and the New Edition of the Author's Poetical Works, with 'contemporary criticism—various readings—and correspondence with some of the most eminent persons of the time when the Poems first appeared,' now in the course of publication in England.

Volume I will be ornamented with an excellent Portrait of Sir Walter Scott.

DAILY PITTSBURGH GAZETTE.

WEDNESDAY AFTERNOON, OCT. 30, 1833.

THE CONVENTION AT WARREN—Is to be held on the 13th of November next, and not on the 15th, as is stated in some of the Philadelphia papers.

THE PORTAGE SUMMIT RAIL ROAD.—We have just seen a gentleman from Johnstown, who informed us that a car would be passed over the whole length of this improvement in the course of two or three weeks. He added, however, that he did not expect that it would be ready for regular transportation before spring.

REGISTER OF PENNSYLVANIA.—We invite the attention of our readers to the address of several distinguished citizens of Philadelphia, in favor of this truly valuable work. We would be pleased to see Pittsburgh extend to it a more liberal patronage than she has heretofore done. The Legislature, and the commissioners of every county in the State, should patronize it, and we trust they will do it promptly and liberally.

THE LANCASTER JOURNAL, a violent anti M'Kean paper, has the following lament, in relation to the election of a United States Senator—

"We cannot think it possible that a man so decidedly hostile to both the President and Vice President of the United States, as Gen. M'Kean has, on *more than one occasion*, shown himself to be, will, or indeed can, be elected to the Senate of the United States, by a party *professedly friendly* to the administration of the general Government. It is enough that a man so obnoxious to a large portion of the party, is tolerated in the State government, where he now is; and the *office holders under the state government*, who are urging his election to the Senate, had better be content—or, they may sow in the wind, and reap in the whirlwind."

We are not at all surprized at the soreness evinced by the editor of that paper—he cannot forget the philippic poured out against the magician, in Samuel M'Kean's letter, in December last; and he is well aware that the election of M'Kean now will be a direct approval of M'Kean's letter, and an unequivocal condemnation of Martin Van Buren, as an "intriguer" and "an unprincipled politician."

Our readers will, probably, recollect that Mr. M'Kean said that his residence, in the northern part of the State, near the New York line, gave him facilities for looking into the character of Martin Van Buren, and, that he had come to a deliberate conclusion, that he was a dangerous man! —The friends of the magician do not forget this testimony; and, on that account, deplore and deprecate the election of Gen. M'Kean.

This, however, we suspect, is not the only reason why they wish to defeat his election.—General M'Kean is viewed as the chief organ of Governor Wolf's administration his defeat will, therefore, be viewed as a triumph over the State Administration, and will encourage the partisans of the magician in their efforts to supersede Governor Wolf, at the next gubernatorial election. On the other hand, the election of M'Kean will strengthen the State Administration, and give the *coup de grace* to Van Burenism in Pennsylvania.

The threat contained in the last sentence of this extract is in the true spirit of the hero of the 2d section. Holders of State offices—*Pennsylvania* State offices—will be dismissed if they do not lend their aid to forwarding the base plans of the unprincipled Magician of *New York*. Truly, this is an impudent threat. The partisans of the intriguer of the empire State carry it with a high hand. The United States Bank, in *Pennsylvania*, must be put down, that a similar institution may be built up in *New York*—and *Pennsylvania* office holders must be punished because they will not become the tools of *New Yorkers*.

Pursuant to notice, the Antimasonic Committee of Correspondence for Allegheny county, met at the Farmer's Hotel, in this city, on Saturday, the 26th instant. David M'Kee being called to the Chair, and C. Darragh appointed Secretary, the following resolutions, on motion of Mr. Davison, of Pitt township, were unanimously adopted.

Resolved, That it is expedient to adopt measures for the more perfect organization of the Antimasonic party, and for the diffusion of information relative to secret societies amongst the people.

Resolved, That Christopher Magee, Thomas Fairman, John R. Roseburgh, M. D., Benjamin Darlington, and James Thomson, be a committee to carry the above Resolution into effect, and that they be empowered to lay before the Antimasons of the county, a plan for said organization, and also, to call township meetings to carry said plan into practice.

On motion, Resolved, That the committee adjourn.

D. M'KEE, *Chairman*.

C. DARRAGH, *Sec'y*.

Latest News From Portugal!

Still Later from Portugal.—The editor of the Boston Transcript has received a file of Lisbon papers to the 9th of September, inclusive. The attack had not been renewed at that date, and Lisbon was tranquil, and the troops under good discipline. The papers contain, in the daily official report, notices of large accessions to the Queen's army, by desertion from the Miguelite ranks. The account of the battle of the 5th, reports the attacking army at twelve thousand strong, and speaks of the repulse as such as to destroy all fears of its being renewed.—Captain Power, also, who arrived at Boston from St. Ubes, whence he sailed on the 20th of September, states that a few days before he sailed, a steamboat from England, with twenty French officers, arms, ammunitions, &c., for Miguel's army, was captured off the Tagus by one of Pedro's cruisers and carried to Lisbon; also that Marshal Bourmont had not renewed the attack on Lisbon since the 5th; Pedro and his forces occupied the city, while Miguel and his army were in the suburbs—Miguel himself occupying the palace a short distance from the city. As St. Ubes is but twelve miles from Lisbon, the news from the latter place may be considered as coming down to the 19th, inclusive.

A trader in Scotland, who recently failed for a considerable amount, attempted to gull his creditors by a false entry, to the following effect:—"By cash lent Don Pedro, for carrying on the war against his brother Miguel, 4,000*l*."

TO THE PUBLIC.

The subscribers, deeply impressed with the importance of preserving in a permanent form the records of interesting facts, occurrences, and improvements, together with public documents and other papers which may in any manner illustrate the history of our growing commonwealth, and anxious to see due encouragement afforded to efforts having this object in view, have found no means more direct, economical, and effectual, than the support of a periodical publication principally devoted to the preservation of historical events. They have, from its commencement, been subscribers to the REGISTER OF PENNSYLVANIA, edited by *Samuel Hazard*, of Philadelphia, and have uniformly been gratified with the nature and variety of its contents, and the just discrimination which has guided the editor in his selection of materials. As the Register has now reached its twelfth volume, they feel entire confidence in recommending it to the public as a work eminently deserving the support of every enlightened Pennsylvanian, and worthy of a distinguished place in every public library in our country. Whoever reveres the memory of the founders of Pennsylvania—whoever regards with interest the magnanimous labors that have raised her to the enviable rank which she holds among the States of the confederacy—whoever looks with interest upon the gigantic public improvements that are scattered over her extended surface, and upon the exhaustless treasures which those improvements are destined to develope—cannot fail to possess a correspondent interest in the work of which it is a leading object to treasure up the record of those events which have made Pennsylvania what we now behold her.

It having been suggested that the work has a circulation more limited than its merits and importance demand, and that its continuance may possibly depend upon an increase of patronage, the subscribers, without any solicitation on the part of the editor, have ventured to offer to their fellow citizens this expression of their sentiments, in order that all who take pleasure in fostering meritorious enterprizes may be induced to consider the claims of the Register of Pennsylvania, and bestow upon it that encouragement which its estimable object and its able management may seem to deserve.

State of Commerce & Industry in Russia.

The Commercial Gazette of St. Petersburgh, presents the state of commerce in the whole empire, during the year of 1832.

The exportations of the produce of Russia exceed the importations by 35 millions of rubles.—The income of the custom house revenue has augmented 13 millions more than the year before. The Commercial Gazette announces, that, in 1832, there have been established 149 new manufactories, and that the number of working hands in their manufactories have increased to 10,475.

In 1832, there were existing in the Empire 5,599 manufactories, which employ 284,358 workmen. There has been introduced, in the Southern part of Siberia, a new and beautiful kind of animal for wool. In Petersburgh, Moscow, and Smolensko, great preparations are made for establishing new fabrics for cloth. The operations of the Russian American Company, have produced, during the years 1830 and 1831, a dividend of 120 rubles for every share.

The Monthly Magazine manifests all their improvements in an excellent article, from which we make the following extract. "After treating of the advantages which the government promised itself from the establishment of Military Colonies, which, in the opinion of Count Ozeirouski, ought to give to the Empire, in the space of 10 years, a national army of 6 millions of soldiers, the English writer enters into the pecuniary resources of Russia. This is a point on which the European politicians ought to reflect seriously.

It is an error to adopt generally for the basis of these calculations the situation of Russia as it was half a century ago, and without taking sufficiently into consideration the prodigious circulation which, since that period, the commerce and industry of that country has acquired. To show the progress of industry, it is sufficient to know that the exports of the produce in the whole empire, which, in 1780, was only 18,720,000 rubles of silver, increased in 1827 to 254,770,423.

Manufactures have multiplied in the same proportion. It is known that Russia, which, in 1788, imported from England all her woollen goods, now manufactures all she wants for her own consumption.

The number of manufactories is limited to 6,000, of which the annual produce, in 1824, was 117,625,735 rubles, whilst the value of exports which, according to the official statement, were, four years before, 58 millions of rubles, increased 26 millions in 1824.

Since that period Russia has acquired a new source of riches—we speak of the gold and diamond mines, which have been discovered in the mountains of Oural. Before 1821, there were only two mines known in the whole extent of the Empire, (in the Government of Tobolsk;) but since the discovery of the great mines of Oural, in which was found a single lump, weighing 25 pounds, the results have been very considerable. From 1824 to 1827 these mines, which are 15 in number, have produced a quantity of gold, valued at 2,500,000 pounds sterling—results more beneficial than were ever obtained in the most abundant mines of South America.

The discovery of the diamond mines is more recent. Noticing the analogies which existed between the Oural Mountains, and those presented by the Diamond Districts of Serrafria, in Brazil, Mr. De Humbold manifested his conviction that the chains of the Mountains of Oural ought, likewise, to contain diamond.

The Russian Government investigated this conjecture, and sent a commission of scientific men, which ascertained the truth of Mr. De Humbold's assertion. They have found, in Oural, diamonds as brilliant, and water as pure as in Brazil.

Russia sees the invincible necessity of extending herself South and East. She is already mistress of the whole navigation of the Black and Caspian seas. Two of the greatest navigable rivers of the Empire empty into the Black sea, and carry them the produce of an immense country, a country so fertile that the agricultural productions are ten times more considerable than the interior consumption requires. A few statistical accounts will be sufficient to give an idea of the abundance of those provisions. Only in the space of ten years, the population of Odessa has increased from five thousand to thirty five thousand inhabitants. In Odessa there are French, Greek, and Italian theatres, schools for jurisprudence, navigation, and commerce, in fact, all the institutions which can be found in the most civilized countri*.*"

Steam Canal Boat.—We learn that it is in contemplation to build a steam boat to ply on the Chesapeake and Ohio Canal, between Shepherdstown and Georgetown. Success to these exertions.—*Alexandria Gazette.*

Supply of Cotton.—The crop in the United States has been a large one. '*Louisiana* papers put down the supply of that state at 200,000 bales, and say that about 600,000 will leave the Mississippi. In *Alabama* the crop is heavy, and the picking season has been very favorable; and a Huntsville paper observes, "We have heard it said, and we believe with truth, that the planters are as forward with their crops at this time, as they were with the previous one in the month of January last—therefore many are nearly or quite ready for market." And adds—"In Huntsville there seems to be but little disposition to purchase at such prices as are considered reasonable by the planter, agreeably to the foreign quotations. The quality of the cotton is represented as very fine, and it has been picked with that care and attention which will insure its creditable comparison with any upland cotton in the U. States."

The Columbia, (S. C.) Telescope of the 15th inst. says "For many days past, our town has presented a spectacle of great activity and animation. The present excellent price of our staple article, and the consequently improved and flourishing condition apparent on all sides, gives the most cheering indications of the quick prosperity that our state will attain *while free trade and nullification prevail*. We understand that one day last week 2,500 bales of cotton came in, on another 2,300, &c. for the purchase of which from 120,000 to $150,000 per day were expended."

Improvement in the style of lighting the attic stories of Buildings.—Among the many advances which are making in the finish of our dwellings and other buildings, we would call public notice to a patented improvement, made by Mr. Wm. W. Wooley, for admitting light into the attic stories, superseding the necessity of the dormer window. This improvement consists of an ornamental iron covering, to be inserted under the cornice, and adapted to the particular architecture of the building. The great advantages of it are, that, while it adds beauty to the building, it is permanent, being equally strong with any other part of the wall—they are cheap from being made of cast iron—and can be multiplied, with safety, so as to cause the attic story to be as well and conveniently lighted as any other.

We understand this plan is now being generally adopted;—the attic is made about six feet high in the front, which constitutes it a comfortable lodging room. Houses, in which these frames are inserted, upon the above principle, are estimated to be of a value considerably enhanced.—*New York Mercantile Advertiser.*

There could not be given a stronger case in point, of the advantages of machinery, than in the case of printing of a Newspaper. Doubtless some men would think it a good thing, if the use of types were dispensed with, and the old system of copying restored, to give employment to a thousand scribes, where there is now one printer. To write off, each day, as many columns of new matter as this paper contains, and as many copies as are printed, would require, by computation, at least *five thousand* hands, which would be a glorious prospect for those who love labor for its own sake. Instead of eight dollars a year, however, we should be compelled to charge at least ten dollars a copy; and next week, we should not sell one daily copy, where we sell one hundred; and after a few weeks, there would not be an 'American' found more than once a month in the hands of two or three rich persons, out of a population of ninety thousand.—The five thousand scribes would have been discharged—the paper makers, type founders, ink makers, carriers, press men, compositors—all to whom the 'American' now dispenses weekly large sums of money for their labor, would lose a profitable employment. They have, in fact, gained profitable employment purely by the inventions of machinery, by which, at the commencement, temporary distress was produced among a comparative few, engaged in the old mode of copying. So it is with all other machinery of every kind, designed to save labor, or time, which is the same thing. We hope we have answered the query, as to the machinery of the 'American.' It is a false philosophy, and pernicious in its practical results, which teaches that any class in the community have a direct interest in checking the productions of industry. Labor, for the sake of labor, is an evil—labor, to create new products, and increase the sum of the comforts of the whole community, is a blessing. We do not say that there may not be a necessity for some just protection to the rights of industry in the fruits of its own toil, and improved systems for the *distribution* of the products. That is another branch of the inquiry—but that the labor of all should be employed to augment the sum of the general wealth, by all means which science can bring to the aid of human strength, is a position which we take to be impregnable.—*Balt. Amer.*

The National Intelligencer, of this morning, republishes the subjoined paragraph from the Philadelphia Inquirer, as containing more truth than most of the "rumors" from that city.—*Baltimore Patriot.*

"*Affairs at Washington.*—We have various rumors from Washington. The greatest confusion and disunion are said to prevail in the Cabinet; the President is almost "worn to the bone,"—and many of his best friends fear that he will not survive his present term. There is no harmony between Messrs. M'Lane and Taney, and crowds of office hunters continue to haunt the palace, and prey upon the aged President. These things cannot last. There must be another explosion, and we trust that the next will destroy the real mischief makers—such vermin as ———, & ———, & ———, and their confederates."

U. S. Bank.—Remarking on the publication in the New York Standard, the National Intelligencer makes the following appropriate suggestions: "We would ask what institution, or indeed individual, in the country, could pay their debts, if *specie* alone was to be required. And has not the Bank ample resources to meet every claim against it. In what do the now favored Banks show a greater ability than the Bank of the United States, to pay in coin?—Look, for instance, at the state of the Bank of the Metropolis, the Bank selected in this city for the public deposits. Last winter, when its latest statement was communicated to the Treasury Department, it made the following exhibit. The claims on it were—

Notes in circulation,	$62,885	
Due to Banks, - -	20,911	
Due to individuals, -	74,977	
		158,773
Its means were—Specie,	10,974!!!	
Due from Banks, - -	5,800	
Notes of do. - - -	23,213	
		40,077
		118,696

"Leaving a deficiency of $118,696, if all the demands were presented at once. We do not say that the Bank cannot meet its engagements; we dare say it can do so; but surely if the Bank of the United States is a doubtful depository of the public funds, the Government has not shown much prudence in employing others situated as that Bank is, when, with a specie fund of $11,000, it might be called on to do business to the amount of several millions annually, as the Branch Bank of this city has done."

The Portland Argus speaks of a box of fine looking *Spanish Cigars*, (which smoked very well, and would pass with all but connoisseurs for first rate,) manufactured in Connecticut, with not a particle of tobacco of any kind in their composition, except that used in the coloring. The outsides were made of the leaves of corn stalks, and the insides were composed of bean leaves and pea pods!

The Virginia Arena has the following in relation to the General Post Office

"Strange rumors reach us of the condition of the finances of the General Post Office Department. A committee of Congress may have a laborious task in investigating abuses. We predict that even Col. Johnson—who considers himself as the Representative of the Post Office in the lower House, and who is, at all times, prompt to break a lance in defence of its reputation—will not be able to baffle the enquiry. The fruits of misrule are ripening fast."

We understand that the Philadelphia Banks have all refused to loan any more money, and to discount notes of all descriptions, until arrangements are made to meet the demands of the Bank of the United States.—In consequence of this, the Bank of Chester county has also declined discounting for a time.—*Westchester Register.*

Population.—A very elaborate paper by M. Moreau de Johnes was lately read at the French academy of sciences on the subject of the increase of population. From the statistical documents it contains, it appears that in Prussia the population doubles itself in the space of 39 years, which is the maximum of acceleration exhibited in Europe; in Austria it takes 44, in Russia in Europe 48, in Poland and Denmark half a century; in the British islands 52 years; in Sweden, Norway, Switzerland and Portugal 56; in Spain 62; in Greece and European Turkey 70; in the Netherlands 84; in Germany 120, and in France it takes 125 years. The period for all Europe is 57 years. Taken together half a century doubles the population of the northern states, while the southern require 80. The causes of the maximum of acceleration in Prussia, Austria, and Russia, are the vast extent of their territories compared with the population, the protection afforded by cold climates to advanced life, the novelty of civilization which creates and multiplies in its development the means of existence, the habit of living on little, appertaining exclusively to newly civilized nations. The minimum of increase in France, Germany and the Netherlands, is caused by the high degree of civilization which these countries have reached, creating a multitude of wants, and submitting the social condition to a variety of causes, which restrain the extension of the human generation. G. Britain escapes these restraints by the immense outlets which her industry and commerce afford to the wants of her population. In the other states of Europe the natural tendency of the population increase is restrained, suspended or destroyed by intemperance, insufficiency of food, the ravages of inundations, disasters from earthquakes, the pernicious effects of marshes, the irruptions of pestilential or epidemic maladies, feudal servitude, monastic celibacy, military or sacerdotal despotism, concentration of poverty, the laws relative to succession, &c.

Fast Sailing.—The fine brig Latona, Captain Snow, arrived yesterday morning at our wharves, in 11 days from the Balize, bringing dates 2 days in advance of the mail from the city of New Orleans. (Said to be the shortest passage known.)—*American Sentinel, Oct.* 26.

MR. GALT.

MR. GALT is now suffering under a second attack of paralysis. The following stanzas, written by Mr. G. in allusion to his own melancholy situation, are touching in the extreme:—

Helpless, forgotten, sad, and lame,
On one lone seat the live long day,
I muse of youth and dreams of fame,
And hopes and wishes all away.

No more to me with carol gay,
Shall mountain lark from pastime raise,
Nor breezes bland on upland play,
Nor far fair scenes my steps entice.

Ah! never more beneath the skies
The winged heart shall glowing soar,
Nor e'er be reach'd the goal or prize,—
The spells of life enchant no more.

The burning thought, the boding sigh,
The grief unnamed that old men feel,
The languid limbs that withering lie,
The powerless will's effectless zeal;
All these are mine, and Heaven bestows
The gifts, but still I find them woes.

Extracts from the Baltimore Prices Current, and Review of the Market, for the week ending Friday evening, October 25.

[*General Remark.*—The money market is still restricted, although, perhaps, comparatively easier than last week. Both buyers and sellers, in almost every branch of trade, continue to be more or less circumscribed in their operations in consequence of this state of things.]

COFFEE.—We note a sale of 1,000 bags St. Domingo for export, (Orion's cargo) at 12 cents cash. The principal holder of Rio has shipped 6,000 bags to Europe, which, with the sale noted above, takes 7000 bags out of the market. The trade buy very sparingly—sales of Rio at 12 1-2 cents for good; prime lots are held at 13 and 13 1-4.

COTTON.—We hear of no transactions in Louisiana. In the early part of the week a lot of 40 bales Georgia Upland was sold at 16 1-2 a 17 cts. per lb., but since then, very limited sales have been made, at a reduction of about half a cent on these rates. The article is very dull.

FLOUR.—*Howard street Flour.*—In the early part of the week, sales of parcels from stores were generally made at $5 75 per bbl. Since the middle of the week, however, the store price has receded, and sales of various parcels have been made at $5 62 1-2. Sales of small lots of choice brands, at $5 75. The fair store quotation, based on our inquiries of to day, may be put down at $5 62 1-2 for large lots. The wagon price has been without variation, at $5 50 per bbl.

PROVISIONS—Limited sales of Mess Pork at $16 50, Prime at $13, and Prime Beef at $9 50 a $9 75. We quote Baltimore Hams at 11 1-2 a 12 cts., and Western at 8 a 10 cts.—Small sales at the latter rate. Sales of Baltimore cured Shoulders and Middlings at 8 cts. We hear of nothing doing in Western Beacon, hog round. Limited sales of No. 2 Butter at 11 cts., and No. 3 at 8 cts. Baltimore Lard is held at 10 a 10 1-2 cts. There were inspected this week 267 bbls. Beef, 587 kegs Butter, and 10 kegs Lard.

SUGARS—At auction on Tuesday, 130 hhds. Porto Rico were sold at $8 75 a $9 80, and 150 bbls. at $8 20 a $8 85. At public sale to day 111 hhds Porto Rico were sold at $8 30 a $9 35, and 103 bbls. at $8 30 a $8 50.

WHISKEY—The market remains dull and inactive, and sales are confined to limited lots only.—We continue to quote *hhds.* at 39 cents. Sales of *bbls.* at 31 a 31 1-2 cents. The wagon price of bbls. is generally 26 cents, exclusive of the barrel; in occasional instances half a cent more, or 26 1-2, is paid. The inspections of the week comprise 66 hhds, and 390 bbls; of which 66 hhds. were received from the Susquehanna.—*American.*

CLASSICAL SCHOOL.

THE Subscriber respectfully informs the public that he has opened a School, in James town, Mercer county, Pa., under the name of the UNION ACADEMY, wherein are taught the various branches constituting a classical education. He already has a number of scholars from very respectable familes in Erie, Crawford, Mercer, and Allegheny counties, and hopes that the salubrity of the town, low charge for board and tuition, and his qualifications as a teacher, may induce many who are not aware of the existence of such a seminary of learning to send their sons to it. The school is divided into five classes, and at a late examination they were examined in the following books, viz:

1st Class—Græca Majora,
2d " Virgil and Sallust,
3d " Ovid's Metemorphoses,
4th " Ovid and Cæsar,
5th " Viri Romæ and Historia Sacra.'

French is also taught.

Price of tuition for all the above branches is four dollars per quarter. Comfortable boarding and lodging can be had in the town for one dollar per week.

The annexed certificates may be satisfactory to persons wishing to send their children; and I beg leave to refer to Rev. John Black for his opinion of the character of the scholars.

CERTIFICATE OF THE EXAMINERS.

JAMES TOWN, Oct. 15, 1833.

We, the undersigned, have this day examined Mr. Gamble's Classical School, and were highly gratified in witnessing the progress made by his pupils. We have no hesitation in saying, they did honor to themselves and to their teacher. The pupils gave every evidence of diligence and close application to study; while the skill and judgment which they exhibited, in parsing and in prosody, evidently proved the superior plan of instruction employed by their teacher.

We most cordially recommend Mr. Gamble as a teacher of no ordinary grade; and are persuaded that at his school a sound and thorough classical education may be obtained.

AN ORDINANCE

CONCERNING THE WEIGHING OF HAY.

WHEREAS, Mellen Chamberlain has proposed to the corporate authorities of the Borough of Allegheny, to erect, at his own expense, in a public part of the town, a hay scale for public use, provided he shall, for three years, have the receipts arising from the same, charging the same rates for weighing that are charged in the city of Pittsburgh—

SECTION 1. Be it ordained and enacted, by the Burgess and Council of Allegheny—That so much of the centre square as shall by the Burgess be deemed necessary, shall be by him set apart for the use of a public hay scale, and the ground so set apart, shall be put into the occupancy of Mellen Chamberlain, who shall have undisturbed possession of said ground for three years from the 1st day of January next—during which time no other public hay scale shall be established by authority of the burgess and council—Provided the said Mellen Chamberlain shall, by the 1st day of November next, erect on said ground a hay scale and apparatus by which hay,in carts, wagons,or sledges, may be correctly weighed—and provided, also, that he shall keep the said hay scale, or cause the same to be kept, in good order and repair, and during said term, at all reasonable times accurately weigh, or cause to be weighed, all cart, wagon, or sledge loads of hay that may be brought to the hay scale—and, provided also, that the ground occupied by him for a public hay scale shall not be used for any purpose or business not connected with the weighing of hay—and provided the said M. Chamberlain or his agents shall not buy to sell again, or buy for any other person any hay brought to said public sale—and provided, also, that the prices charged for weighing and issuing certificates of weight shall not exceed the rate charged, or that may be charged, by the weigh master at the hay scales in the city of Pittsburgh.

SEC. 2. That all hay, sold within the limits of the Borough of Allegheny shall, after the 1st day of November next, be weighed at the public hay scale, and any person who shall thereafter sell or buy any hay to be delivered within said limits, shall forfeit and pay a fine of Ten Dollars.

SEC. 3. That any person who shall offer any altered certificate concerning the weight, or who shall practice any fraud in selling any load or parcel of hay, shall forfeit and pay a fine of Twenty Dollars.

SEC. 4. That the said Mellen Chamberlain or any agent whom he may appoint to weigh at the public hay scale, shall, before the Burgess, make oath or affirmation that he will faithfully, and to the best of his abilities, correctly discharge the duties appertaining to the weighing of hay--and in case the said Mellen Chamberlain, or any agent of his, shall carelessly or negligently do the business of weighing at the hay scale, or wilfully give any misstatement of the weight of any lot or parcel of hay, he or such agent shall forfeit and pay a fine of Twenty Dollars.

SEC. 5. That any person who shall wilfully do any injury to the public hay scale, or to any fixture or property connected therewith, shall forfeit and pay a fine of Twenty Dollars.

Ordained and enacted into a law, the 5th day of October, A. D. 1833.

JOHN TASSEY,
President of the Council.

Attest—JOHN MORRISON, Town Clerk.

Approved. In testimony whereof, I have hereunto caused the seal of the corporation to be affixed, the 5th day of October, A. D. 1833.

PIANO FORTES.

MR. TAYLOR respectfully announces to the citizens of Pittsburgh, that he has just received an assortment of PIANO FORTES, from the celebrated manufactory of Robert Nunns, Clark, and Co. (late R. & W. Nunns,) of New York, which he offers to the public at a fair price, and liberal terms.

The instruments of this most extensive establishment have (for quality and volume of tone, and for materials and workmanship) received the decided approbation of the most distinguished professors of this country and Europe. The manufacturers therefore feel confident in resting their claims to public patronage upon the intrinsic merits of the Piano Fortes themselves.

FLUTES.

Also, a few of 'Taylor's approved' Flutes; these instruments are well worth the attention of the Amateures of the Flute.

☞ Ladies and Gentlemen are invited to call and examine the above instruments, at Cook and Schoyer's (late Sylvester's) store, corner of Wood and Third streets, where they will remain but a short time, Mr. Taylor's stay in this place being limited. Oct. 7, 1833.

TO ENGINEERS.

A CORRESPONDENT of the Subscribers, who resides in Tennessee, wishing to erect a Rolling Mill, at Louisville, Ky., Nashville, Tennessee, or some intermediate point, as may be deemed most advisable, is desirous of informing himself as to the cost of such an establishment, capable of rolling TWELVE TO FIFTEEN HUNDRED TONS OF IRON, of the various descriptions embraced in a general assortment.

As the location of the Mill is yet undetermined, a FULL PROPOSAL is not expected; we will, however, receive Estimates of the cost of the Engine and Machinery, and probable cost of the building; the Contractor to furnish ALL except the ground on which the building shall be erected. The mill to be delivered ready to go into operation. Such Estimates, expressing the terms of payment, and time required for the completion of the work, handed to the subscribers, on or before the 30th inst., shall be submitted at once, and it is presumed that the most favorable offer will result in a contract.

SIX EGYPTIAN MUMMIES

In the Diamond, next door to the office of The Pittsburgh Gazette.

THE features of some of these mummies are in perfect expression—the hair of the head preserved as if now living. For the direct purpose of giving visitors, of all descriptions, that wish to see the ancients themselves, and likewise the bodies that were embalmed not less than three thousand years ago, this collection was exhibited to a numerous concourse of visitors, in the city of Philadelphia, for the space of 3 months; and next in Baltimore, in the Museum, for five weeks, where contract was only made for two weeks, and continued for five weeks by request. The inhabitants of this city, it is hoped, will call, and patronize a collection worthy the attention of the curious.

The proprietor is authorized to use the names of the most eminent physicians and professors in the city of Philadelphia, and likewise that of Baltimore.

SALE OF REAL ESTATE.

THE Subscribers, Trustees of the New Philadelphia Society, at Phillipsburgh, Beaver county, Pennsylvania, offer for sale the following property, to wit:

1	tract of land	containing	330 acres
1	do	do	330
1	do	do	67
1	do	do	7
1	do	do	40

other lots, containing about 6

The above lands lie in one body, fronting about two miles upon the Ohio river—immediately opposite the mouth of Big Beaver creek, and the Beaver Division of the Pennsylvania Canal. The land is rich, and a part of it under a high state of cultivation—its location pleasant and healthy. The improvements upon the same are valuable, including the town of Phillipsburgh, late the residence of Count Leon, and the New Philadelphia Society. The town contains about 40 Dwelling Houses, now in order; some of them brick houses and two stories high. A large and spacious Hotel, a Store house, Church, a number of Shops, for mechanics, Stables, Barns, and other out houses. Also, two large new buildings, lately erected, but not yet finished, one of brick, the other of frame (the latter suitable for a manufactory) a very extensive public garden, and also fruit trees of various kinds. The property has also attached to it the right of a ferry across the Ohio, which is valuable, and becoming more so every day.

The above property is situated in the midst of a wealthy and prosperous country, distant about 28 miles below Pittsburgh, and one mile from Beaver, the seat of justice for Beaver county—and having a view for many miles up and down the Ohio, and of the country to a great distance around.

The subscribers are confident in saying that few situations could be found, presenting greater facilities to the farmer, mechanic, the manufacturer, and others—a soil rich and productive—the neighborhood abounding in coal—well timbered and watered, and, by means of the Pennsylvania Canal, and steamboat navigation, a cheap and ready conveyance to market, and a communication with other places is ensured.

The property is susceptible of divisions into farms, or for the location of new towns, or for the extension of the present one.

Should it not be sold on or before the first day of January next, it will then be offered at public sale, upon the premises, to the highest and best bidder.

It will be sold in a body, or in parcels, to suit purchasers.

Terms of sale will be reasonable.

Information can be had by enquiring of the subscribers, two of whom live in the neighborhood, and one on the premises.

PERIODICALS.

AMERICAN RAILROAD JOURNAL, and Advocate of Internal Improvements, which is designed as a repository of the accounts of the rise and progress of numerous works of Internal Improvement, in the United States particularly, and in other parts of the world generally. The work is published weekly, and forms a large octavo volume each year, of 832 pages of 3 columns each, for $3 per annum, in advance.

New York Farmer, and American Gardener's Magazine. This work is designed for the agriculturist, and will be found to contain much, both interesting and profitable, to those who cultivate the soil as a business, or merely a garden for amusement. Published in monthly parts of 32 large octavo pages, with three columns each, at $3 per annum, in advance.

Mechanics' Magazine, and Register of Improvements and Inventions. To the Mechanics of the United States—In this populous and enlightened country, almost every description of persons can obtain knowledge and amusement connected with their peculiar pursuits, through the medium of the Journal or Magazine, especially devoted to their interests. The Theologian, the Farmer, the Philosopher, the Sportsman, and even the Plough Boy, has each his Journal, where he can find a record of the passing events of the day, connected with his peculiar avocations and recreations. Hitherto, the Mechanics (who form a large and most important portion of the community) have had no Journal, to which they could turn, with the certainty of finding that information they desire, no periodical of which they could say: 'This is ours, and for us.' In the hope that the attempt to supply such a want at a price so reasonable as to be within the reach of all, will meet with your active support, the subscriber proposes to publish, on the first day of each month, a Mechanics' Magazine. It will contain a well digested selection of the most useful and interesting articles in the London Mechanics' Magazine, London Register of Arts and Sciences, Repertory of Inventions, Library of Useful Knowledge, Journal of the Franklin Institute, and other works, connected with the arts and manufactures, published in this country and in Europe, accompanied with numerous and well executed Engravings. Its pages will be open for the communications of all, and especially for those of the practical artisan, to whose interest it will be particularly devoted. The Mechanics' Magazine will contain, also, a due portion of the occurrences of the month, Scientific and Literary Reviews of Books, Anecdotes, Economical Receipts, Reports of the state of Mechanics' Institutions, and other Scientific Societies in this state and other countries. To be published monthly. Each succeeding number will contain 64 pages, handsomely printed, and stitched in a neat cover. Six numbers will form a volume, for which an index and title page will be supplied, and also a Portrait of some distinguished Mechanic, as a Frontispiece. Terms, $3 per annum, in advance.

PITTSBURGH.

WILSON & SMITH, from N. York,

RESPECTFULLY inform the citizens of Pittsburgh and the neighboring towns, that they have commenced the manufacture of the above beautiful and elegant article, so much admired and worn throughout Europe, and the principal cities in the United States.

W. & S. beg leave to observe, that, after various experiments, they have at last succeeded in bringing this Hat to the highest state of perfection, and they can assert, with confidence, that in point of color, lightness, elasticity, durability, and general beauty of appearance, they cannot be surpassed by the most expensive Hat that is made. Gentlemen are invited to call and examine them, and judge for themselves.

Wholesale Dealers supplied at the same prices as in the New York markets.

DOCTOR ROBERT'S ☞ *WELCH MEDICAMENTUM.* ☜

FOR the cure of Dyspepsia, Liver Complaints, Jaundice, Cholic, Fever and Ague, Dysentery, Headach, Loss of Appetite, Flatulence, Hypochondria, Hysterics, Dropsical Complaints, and Heartburn, It also prevents all Bilious disorders, and removes habitual Costiveness, Asthma, Strangury, Gravel, Rheumatism, Gout, and Impurities of the Blood.

A person who uses this Medicamentum will not require the use of the lancet, or any means of the healing art. It restores and revives the animal spirits, invigorates the system, removes nervous tremors, obtunds rheumatic and anthritic pains, and prevents their return. It cleanses the stomach of all morbid humors, which cause indigestion, acidities, headach, and lowness of spirits; cures all bilious disorders, and all cholics of the stomach and bowels, almost immediately; inspires cheerfulness; gives comfort to the dropsical; takes away palpitation of the heart; gives circulation to the blood; restores bloom to the sallow or sickly cheek, and plumpness to the meagre habit; purges without pain, and banishes all cause of fever of every kind. It acts on the stomach, that great reservoir of the human system, a diseased state of which causes all diseases. No alteration in the usual habits of life is required, but the abstaining from distilled ardent spirits.

CERTIFICATE,

From Rev. Derick Lansing, D. D., Pastor of the Second Presbyterian Church in Utica.

UTICA, Jan. 6, 1830.

To Dr. Hitchcock.—Dear Sir: I have always been one of the number of those who have placed little confidence in *nostrums* or *specifics*, and for this reason, although I saw your advertisement of the Welch Medicamentum, I could not bring my mind to consent to use it. My sufferings, from indigestion, during the past summer, were so severe, as materially to affect my comfort, and my capacity for usefulness. I have reason to thank you, sir, that, on hearing of the state of my health, you kindly sent me your Medicamentum. I have taken it faithfully, and with entire success. I have not been visited with one of those turns of distress, which before were weekly periodical, since I began to take your valuable medicine. Could I receive the same relief which I have hitherto experienced, on condition of taking it for life, I should cheerfully comply with such condition. Your's, very truly, D. C. LANSING.

ANTI-DYSPEPTIC ELIXER.

ONE of the most agreeable and efficacious Medicines ever discovered for the permanent cure of those chronic states of derangement of the stomach, constituting that miserable disease called Dyspepsia.

The basis of this Elixer is vegetables, and perfectly innocent in its operation; it destroys that sour state of the stomach, the instant it is taken, and stops the morbid secretion, by giving strength to the muscular fibre of that important organ, by which means the peristaltic motion of the intestines is increased, and the costiveness obviated; a new action is given to the system, which puts an end to a train of distressing nervous sensations.

Another form of the disease in which the Elixer is admirably calculated to relieve, is the decline of fever, where the stomach will not bear the ordinary strengthening medicines indicated in such cases, it has the surprising effect of giving vigor, and restoring the natural secretions of the body, without increasing the febrile state. Not the least danger is to be apprehended from exposure to cold, while under the use of this medicine, nor will it interrupt necessary employment of the patient a single hour.

☞ A number of cases of cures performed by the Anti-Dyspeptic Elixer in the vicinity of Pittsburgh can be given.

GEO. W. CARPENTER'S COMPOUND SYRUP OF LIVERWORT,

A SAFE and Valuable Medicine for Coughs, Spitting of Blood, Consumption, and Liver Complaints.

Most of the medicines made use of for the above diseases are of a stimulating nature, composed generally of Resins and Balsams, in alcoholic solutions, which, although sometimes giving temporary relief, in almost every instance where they are freely used, aggravate the disease, and reduce the strength of the patient.

This article possesses superior advantages over these preparations, its action being of a tonic, invigorating and strengthening nature, thus overcoming the disease by promoting expectoration, and gradually increasing the strength of the patient, and thus, without being attended with any unpleasant effects: it also agrees with the stomach, in a cases, and is a pleasant medicine to take.

PATENT PLANING MACHINE.—The right to use this valuable machine, invented and patented by William Woodworth, and known as Woodworth's Patent Planing Machine, may be obtained on application to the subscriber for the counties of Allegheny, Butler, Beaver, Washington, Green, Fayette, Somerset, Cambria, Indiana, Jefferson, Clearfield, M'Kean, Warren, Venango, Mercer, Crawford, and Erie, in the State of Pennsylvania. That part of Maryland lying west of the Blue Ridge; all that part of Virginia lying west of the Blue Ridge, except the county of Ohio. The whole of the state of Ohio except the counties of Hamilton, Butler, and Montgomery. The whole of the state of Kentucky, except the counties of Jefferson, Boone, Oldham, Gallatin, and Campbell. The whole of Indiana, except the counties of Floyd, Clark, Jefferson, Dearborn, and Switzerland. The whole of the state of Illinois, and the territory of Michigan. Rights to use the machine in that part of the United States, named above, will be sold by the single county or in larger districts. As it is presumed that no one will purchase without seeing the machine at work, a description of it is deemed unnecessary. Should any person, however, wish to purchase, and find it inconvenient to visit the places where it is in operation, a machine will be furnished, warranted to plane, tongue and groove, and bring to an exact width and thickness, a white pine board of 12 feet long, and of any width from 1 to 14 inches, in one minute and ten seconds, or an oak board of the same dimensions in 2 minutes and 10 seconds. Machines may be seen at work in the cities of New Orleans, Washington, Philadelphia, New York, Boston, and others at the south and east, at Wheeling, Virginia, and at the saw mill of Messrs. Irwin & Herron, in this city.

Persons desiring to purchase will have the certificates of scientific and practical men who have seen it at work, in the different places in which it has been put up, forwarded to them. They give their opinion as to the great value of the invention, state the time they have seen boards dressed by this machine, and describe the quality of the work as compared with that performed by hand labor.

VALUABLE PROPERTY FOR SALE.

THE Subscriber offers for sale the farm on which he lives, in Washington county, on Pigeon creek, one mile south of Williamsport, on the Monongahela river, to which there is a perfectly level road. This farm contains near 400 acres, the greater part of which is first rate land. There is on the premises a Brick Dwelling House, a Merchant mill, in good repair, a new saw mill, a stone still house, 35 by 40 feet; a salt works is also in operation, and worked to advantage; about 150 acres of land cleared and under good fence. There is on the premises three small tenements for the accommodation of families. This tract is well timbered, and abounds with stone coal and springs of water, both of the best quality.

To a person wishing to embark in a manufacturing business, and possessing capital, this would be a very desirable situation, having the advantage of both water power from Pigeon creek, and banks of the very best coal near to the works, and easy of access, and its vicinity to so navigable a river where articles of any kind are so cheaply transported to Pittsburgh.

For further particulars, apply to James P. Stuart, Merchant, Wood street, Pittsburgh, or to the subscriber on the premises.

TRAVELLERS.

THE LINE OF STAGES between Chambersburgh and Baltimore, on the Somerset and Mountpleasant route, has been doubled, and now runs DAILY, (Mondays excepted,) leaving Chambersburgh *at day-light* in the morning, and arriving in Baltimore, early the same evening.

Passengers reach Philadelphia, in this way, the second afternoon, from Chambersburgh, without the loss of any rest; taking the splendid STEAM BOAT LINES, which set out at 6 o'clock in the morning, [via CHESAPEAKE AND DELAWARE CANAL, a work well worth the trip to see.]

REESIDE, Owner.

In all cases where the passengers desire to reach Baltimore in time for the 5 o'clock steam-boat to Philadelphia, they can do so by leaving Chambersburgh at one o'clock in the morning, or immediately after the arrival of the Western Mail Stage. In this way, they arrive in Philadelphia, by eight o'clock the *second morning*, from Chambersburgh.

☞ When a load offers, the stage will run on Mondays. April 23, 1830.—tf.

TYPE FOUNDRY.

HAVING purchased of Mr. Richard Ronaldson, his long established and very extensive Type Foundry, the subscribers have formed a co-partnership for the purpose of continuing said business, and for the convenience of their friends and patrons, have removed their establishment to a more central part of the city. As it is their intention to keep on hand a good assortment of the best type, and to make such additions and improvements as the taste of the trade and the wants of the country require, they flatter themselves that this establishment will merit a large share of patronage. They have now several founts on hand, which can be furnished at a few hours' notice, and are prepared to make founts of all weights and sizes, from Pearl to 22 lines Pica, including a variety of Ornamental Letter. Their assortment of Cuts, Dashes, Brass Rule, and other Ornaments, will be found to be very extensive, of which specimens will be forwarded to Printers as soon as they can be prepared.

Printing Presses of every description, Printing Ink of the most approved qualities, Composing Sticks, Brass and Common Galleys, Chases, Imposing Stones, Cases, Paper and Press Boards, Standing Presses, Furniture, together with a complete assortment of all articles used in a Printing Office, will be kept constantly on hand.

Small founts, suitable for Book Binders, in great variety, may be had when called for.

Orders from all parts in the Union will be promptly and most carefully attended to, and particularly in supplying *sorts* for all founts furnished by their predecessors, Binny & Ronaldson, and Richard Ronaldson.
